

# Training Opportunities

These training sessions can be especially useful for recruits before their drill, but no one should ever feel pressured to have a training session. As always, this training is **100% optional and voluntary**. Training is **not required** in order to rat or dispatch.

While we have a lot of information written down in the Fuel Rats Knowledge Base, and watching rescues in #fuelrats provides valuable knowledge, nothing beats hands on experience. This experience can be gained on live rescues, or in a controlled environment where situations can range from standard rescues to any situation under the sun. This hands-on experience is useful for ratlings and experienced rats alike.

A number of rats have volunteered to help provide training from basic rat/dispatch skills to more advanced skills, like TFPs. If you see any of the rats named below in chat, and are interested in training, feel free to reach out to them in IRC for some organized practice.

Do not hesitate to ask your trainer to experiment with new or different procedures, try out new ships, or any other scenarios that you can imagine.

The drill channels can be used for training, though there is no need for an overseer to be involved with training. Please note that **a training session is NOT a drill**.

Anyone interested in volunteering to *offer* training, please contact **Anja324** or **Velica Foriana**.

The best way to get training is by DMing a trainer. While approximate time zone availability is generally preferred, many trainers keep different schedules- feel free to ask! If you choose to message multiple trainers at the same time, please only schedule a session with one.

## Rat Training

These trainings are intended to cover basic ratting skills to get you ready for rescues, or to add to your knowledge with advanced topics.

### Basic Topics:

- *Standard cases*
- *Debriefing*
- *Common rescue scenarios*

### Advanced Topics:

- *Code red rescues*
- *Long range rescues*
- *Non-standard rescue scenarios*

### Resources and References:

## Dispatch Training

This training is geared towards developing drilled rats for the role of dispatching. Use of MechaSqueak, dispatching multiple cases, dealing with issues during rescues and special rescue cases are all potential topics.

### Basic Topics:

- *Standard non-CR cases*
- *Common client mistakes*
- *Code red cases*
- *Long range rescues*
- *Foreign language cases*

### Advanced Topics:

- *Mecha commands and operating without a bot*
- *Troubleshooting*
- *Special and unique scenarios*
- *Stress and case management*

## TFP - Tactical Face Plant and Blind Drop Training

This training covers the very specific case of a client who has gone CR in the exclusion zone of a stellar body. These sessions may be announced in #ratchat now and then, or you can try asking one of the trainers yourself. This training can also be arranged to include the instruction of blind drops as a tool to combat difficult instancing.
