

Official Fuel Rats Fleet Carriers

Building the Fuel Rats Fleet Carriers

Official fleet carriers are being set up for The Fuel Rats. The accounts that will be holding these carriers are dedicated accounts assigned to long-term Janitors. These are fresh accounts, and thus need a little help in getting to where we need them to be to effectively deploy our carriers when launch day comes.

What can Rats do to help out?

The Fleet Carrier accounts will host Private Group sessions for mining and other forms of credit boosting. The carrier account will be running builds focused on cargo capacity and collection, and we will organize mining wings to help mine high value materials that the fleet carrier can sell to build up their credit balance.

Depending on how quickly we can get the accounts to the required 5+ billion credits (plus a considerable headroom for outfitting and maintenance costs), the Fuel Rats intend to field at least 2 carriers, possibly 3.

How do I get involved?

Send a Friend Request to the Carrier accounts (CMDR names are to the right) and they will send you a PG invite. When there is a session underway, it will be announced in #ratchat for people to join in. There may also be scheduled events announced ahead of time. You can also contact the Janitor holding the account to arrange a drop-off of goods, if you have a donation to the 'cause'.

Current Carriers

Fleet Carrier 1 (The Rat Nest)	Mama needs your LTDs!
CMDR Name: Ratmama Status: Complete Deployment location: Fuelum Available Funds: ~1.5b Controlling Janitor: Absolver
